PROFESSIONAL SUMMARY

Computer Science undergraduate at Vellore Institute of Technology (CGPA: 9.45) top 1% with hands-on experience in **Full Stack Web Development (MERN Stack)** and strong foundations in **Data Structures, APIs, and scalable application development**. Built real-world projects including a deployed expense tracker and personal portfolio. Passionate about building responsive, user-focused web applications and solving real-world problems through clean and efficient code.

EDUCATION

Vellore Institute of Technology, India

B.Tech – Computer Science and Engineering

Expected Graduation: 2028

CGPA: **9.45 / 10**

Relevant Coursework:

Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks, Machine Learning

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript

Frontend: React.js, HTML, CSS, Tailwind CSS, Flutter

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code

Concepts: REST APIs, Authentication, MVC Architecture, Data Structures

PROJECTS

Expense Tracker (MERN Stack)

- Developed a full-stack expense tracking web application using **MongoDB, Express, React, Node.js**
 - Implemented **CRUD operations** for managing income and expenses
 - Built a full-stack **Expense Tracker (MERN)** with **JWT authentication and protected routes**
 - Designed REST APIs handling **X+ transactions efficiently**
 - Improved UI responsiveness using React state optimization
 - Deployed on Vercel/Render with live access
 - Github code: <https://github.com/Ganavi5/expense-tracker-mern.git>
 - Vercel link: <https://expense-tracker-mern-nu.vercel.app/>
-

Personal Portfolio Website

- Built a responsive portfolio website using **React.js**
 - Showcased projects, skills, and resume in a structured format
 - Implemented modern UI design and smooth navigation
 - Optimized for performance and mobile responsiveness
 - Github code: <https://github.com/Ganavi5/Portfolio.git>
 - Vercel link : <https://portfolio-beta-snowy-56.vercel.app/>
-

NLP-Based Viral Genome Classification

- Developed an NLP-based ML pipeline for classification of genomic data
 - Applied Gradient Boosting ensemble techniques for improved accuracy
 - Built scalable preprocessing and feature extraction workflows
 - Github code : <https://github.com/Ganavi5/Viral-Nlp-Ml-Starter.git>
-

Semantic Segmentation using Custom U-Net (PyTorch)

- Built a deep learning model for multi-class image segmentation
- Improved performance through hyperparameter tuning and preprocessing
- Implemented using PyTorch with custom architecture

RESEARCH & PUBLICATIONS

- Co-author of research paper:
"NLP-Driven Gradient Boosting Ensemble Framework for Automated Viral Genome Classification"
 - Accepted at **RMKMATE 2026 International Conference**
-

ACHIEVEMENTS

- Selected for **Visa Inc. Cybersecurity Learning Program – Foundation Track**
 - Shortlisted for **Visa Cybersecurity Intermediate Program**
 - Maintained **9.45 CGPA** in B.Tech CSE
-
